

## Waste & Recycling

### MS Dynamics NAV ENWIS

Microsoft Dynamics NAV **ENWIS** (**EN**terprise **W**aste **I**nformation **S**oftware) is the business software system officially certified by Microsoft for the Waste Management & Recycling Services business sectors. **ENWIS** is a completely integrated full Enterprise Resource Planning (ERP) software system covering every department functionality needed of a Waste & Recycling organization, completely embedded into a general business-economic standard-software. In **ENWIS** each data set exists exactly only once in the system, accounting for efficient working processes and a high level of transparency. **ENWIS** has been in constant development for over two decades and is the result of practical requirements of more than 200+ companies from all sectors of the Waste & Recycling marketplace. ITA Dynamics is the representative of the Microsoft Dynamics NAV **ENWIS** software system stateside with sole distribution rights within the USA, Canada, & Mexico for this system, with implementation and upgrading expertise for waste services and recycling businesses.
