

Introduction

ITA Dynamics is the North American provider of business applications giving organizations “One Version of the Truth,” by delivering exceptional service and sustainable value through consulting, business software and IT implementation. Our diverse clientele includes small, medium and global enterprises customers in the waste, recycling, and other service micro verticals.

ITA Dynamics applies its industry knowledge and best practices philosophy to provide off the shelf Microsoft Dynamics® ERP and technology solutions throughout the Americas, with 19 business partners and over 300 consultants worldwide.

ITA Dynamics specializes in a multitude of Waste & Recycling micro verticals allowing us to focus on the best practices of the industry. Our partner network allows our customers to expand and grow their companies anywhere in the world.

Your Microsoft Certified Partner

ITA Dynamics has extensive experience implementing and integrating Microsoft solutions. Our experts have worked closely with Microsoft product teams, and were among the first to complete successful deployments and integrations with Microsoft “Dynamics,” formerly “Business Solutions” products. Today, we offer the following Microsoft solutions to complement your existing business systems:

- Microsoft Dynamics NAV, SL
- Microsoft Windows Server
- Microsoft SQL Server
- Microsoft SharePoint Portal Server
- Microsoft .NET Framework
- Microsoft Business Network (MBN)
- Microsoft Exchange Server

Focus Areas

Our industry knowledge, and close partnership with Microsoft, established and local success and global partners is how we make a difference for our customers. We deliver flexible, fully integrated solutions based on Microsoft Dynamics® ERP software, including:

- Microsoft Dynamics® NAV, formerly Microsoft Business Solutions - Navision
- Microsoft Dynamics® SL, formerly Microsoft Business Solutions - Solomon

Our sole focus on the Waste & Recycling industries provides our customers with the confidence that we have done it before and the ability to reduce deployment risk by leveraging our previous success and experience.
