

Waste Services

ENWIS waste offers approved functionalities for representing all business transactions and working processes of waste management like:

Substance Flow Management

Container Service & Rental Invoicing

Movement Form Methods

Weighbridge / Scales Connection, Creating Weighbridge / Scales Ticket

Fleet Management and Dispatching

Operational Journal, and so on...

Integration of the complete solution is outstanding from general ledger and order entry and processing up to container management and to satellite supported vehicle monitoring.

All information is available where it is needed. This results in a considerable increase in efficiency of all business transactions. From order entry to dispatching up to order reviewing, invoicing and posting of incoming payments and to cost accounting a seamless data flow and an extremely efficient working process is taking place. Input of data is reduced to a minimum, possible sources for mistakes are eliminated. A unified data-structure in all sectors of the system is guaranteed.

One highlight is ENWIS Dispatch, the completely integrated telematics solution, which allow a satellite supported monitoring of the entire vehicle fleet. There is constant communication between the head office and the vehicles via GPS and radio data transmission (GPRS).

Expertise for Private Waste Management

All companies of the waste business are facing growing cost pressure and increased requirements. More and more large, international players are surging onto the worldwide market. The mostly medium sized companies of waste management are, therefore, facing new challenges. Efficient processes and company transparency are today more important than ever. Businesses need to react to survive and thrive in an increasingly competitive market.

ITA Dynamics assists you at this with know-how gained over many years and a unique solution. ENWIS waste is a complete business software covering all operative and economic functionalities of waste management. ENWIS waste has approved and user-friendly functionalities:

Customer Management

Container Management

Fleet Management and Dispatching

Operational Journal, and so on...

All applications run without interfaces and media breaks in one single system. ENWIS waste often replaces up to a dozen special applications and assures with this maximum efficiency. ENWIS waste is successfully used by large and small medium-sized waste disposal companies for many years, by well-known producers of dangerous and radioactive waste, by disposal companies for hazardous waste, in the sector of file shredding and so on.
